Sidley (Bexhill)	2.3	-6.8	21.0	-14.5	8.4	10.6	-1.2	21.1

Source: ESiF, Population estimates. Published August 2010, including mid-year population estimates from mid-2001 to mid-2010. This dataset shows that Bexhill has experienced a large population growth of over 45 year olds since 2001.

Table 4 Life Expectancy

Health expectancy	Life expectancy	Healthy life expectancy	Disability-free life expectancy
England and Wales	78.3	70.5	62.7
South East	79.4	73.2	65.8
Rother	79.3	73	64.8
Bexhill	78.6	71.6	63.0
Central (Bexhill)	77	68.7	59.9
Collington (Bexhill)	79.3	73.8	65.4
Kewhurst (Bexhill)	82.4	75.8	67.7
Old Town (Bexhill)	80.2	72.8	62.3
Sackville (Bexhill)	76.4	69.2	61
St Marks (Bexhill)	79.8	74.4	66.8
St Michaels (Bexhill)	76.1	68.9	60.6
St Stephens (Bexhill)	79.7	71.8	63.4
Sidley (Bexhill)	76.9	68.6	60.2

This dataset gives 3 measures of health expectancy at birth:

- healthy life expectancy (HLE) at birth, defined as expected years of life in 'good' or 'fairly good' health;
- disability-free life expectancy (DFLE) at birth, defined as expected years of life free from limiting long-standing illness or disability.

- life expectancy at birth is also given for comparison and so the number of years of ill health can also be examined.

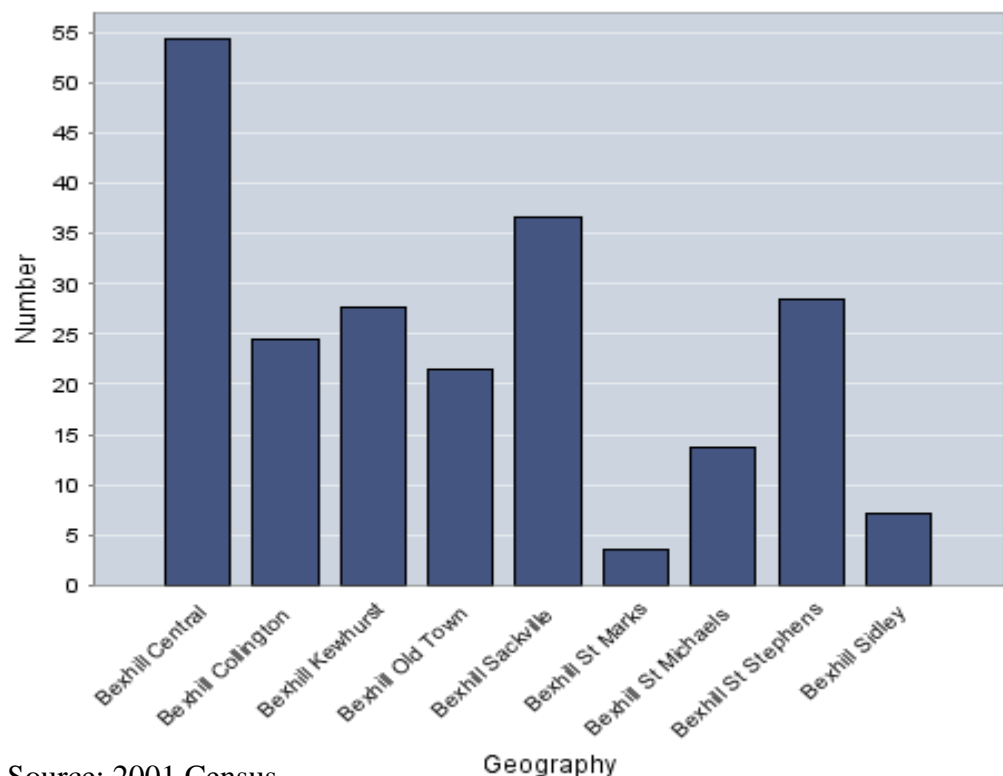

Data is presented as an average for the period 1999-2003. These are experimental statistics, meaning they are in the testing phase and not fully developed and so should be treated with a degree of caution.

Table 4 shows that the life expectancy, healthy life expectancy and disability free life expectancy are all higher in Bexhill than the national averages.

Source: Office for National Statistics, Life Expectancy at Birth 1999-2003 (experimental statistics)

Table 5 Population Density

	Persons per hectare
England and Wales	3.4
South East	4.2
Rother	1.7
Bexhill Central	54.4
Bexhill Collington	24.4
Bexhill Kewhurst	27.7
Bexhill Old Town	21.6
Bexhill Sackville	36.6
Bexhill St Marks	3.6
Bexhill St Michaels	13.7
Bexhill St Stephens	28.5
Bexhill Sidley	7

Source: 2001 Census

This dataset shows the population density as persons per hectare. This is calculated from the total resident population and the area in hectares shown in the 2001 Census. Battle Town has a far greater population density than Rother as a whole but is below the national level.

Source: CACI 2010

This dataset shows the number and percentage of adults who had a daily connection to the internet in 2010.

This table shows that a lower percentage of adults in Bexhill had a daily connection to the internet than Rother as a whole; the percentage is also lower than the regional and national levels.

Source: Department of Communities and Local Government, Indices of Deprivation, 2007 (based on work undertaken by the Social Disadvantage Research Centre (SDRC) in the Department of Social Policy and Social Work at the University of Oxford).

This dataset shows the results from the Indices of Deprivation 2007 (ID 2007) for super output areas (SOAs) in East Sussex. Scores and rankings are given for the Index of Multiple Deprivation (IMD) and for each of the seven separate 'domains' of deprivation from which it is constructed.

The indices are used widely to analyse patterns of deprivation and to identify areas that would benefit from special initiatives or programmes. They are also an important tool in determining eligibility for specific funding streams. Bexhill Ward: Sidley scores the lowest average while Bexhill Ward: St Marks has the highest average score.

Source: CACI 2010

This dataset shows median incomes and the number of households, and also gives the number and percentage of all households whose income is below 60% of the GB median household income, which in 2010 is £17,067. This is commonly used as a definition of poverty. Bexhill has a comparatively high proportion of households in poverty compared to national, regional and county levels. The Bexhill figure is also higher than the figure for Rother as a District (29%).

Children living in poverty

Bexhill Sidley	39.5	38.6	40.4

Source: HM Revenue & Customs, Child poverty statistics.

This dataset shows the number and percentage of children living in poverty. In this table, children in poverty are defined as those who are living in families who are in receipt of Child Tax Credit (CTC) whose reported income is less than 60% of the median income, or who are in receipt of Income Support (IS) or income-based Jobseekers Allowance (JSA). This table shows that the percentage of children living in poverty within Bexhill is above the national and regional levels and has increased between 2006 and 2008. However the Bexhill Ward: Sidley has very high levels greatly exceeding the national levels.

Note: Data only available down to ward level

This dataset shows total number of 'affordable' housing units completed by year from 2002 onwards.

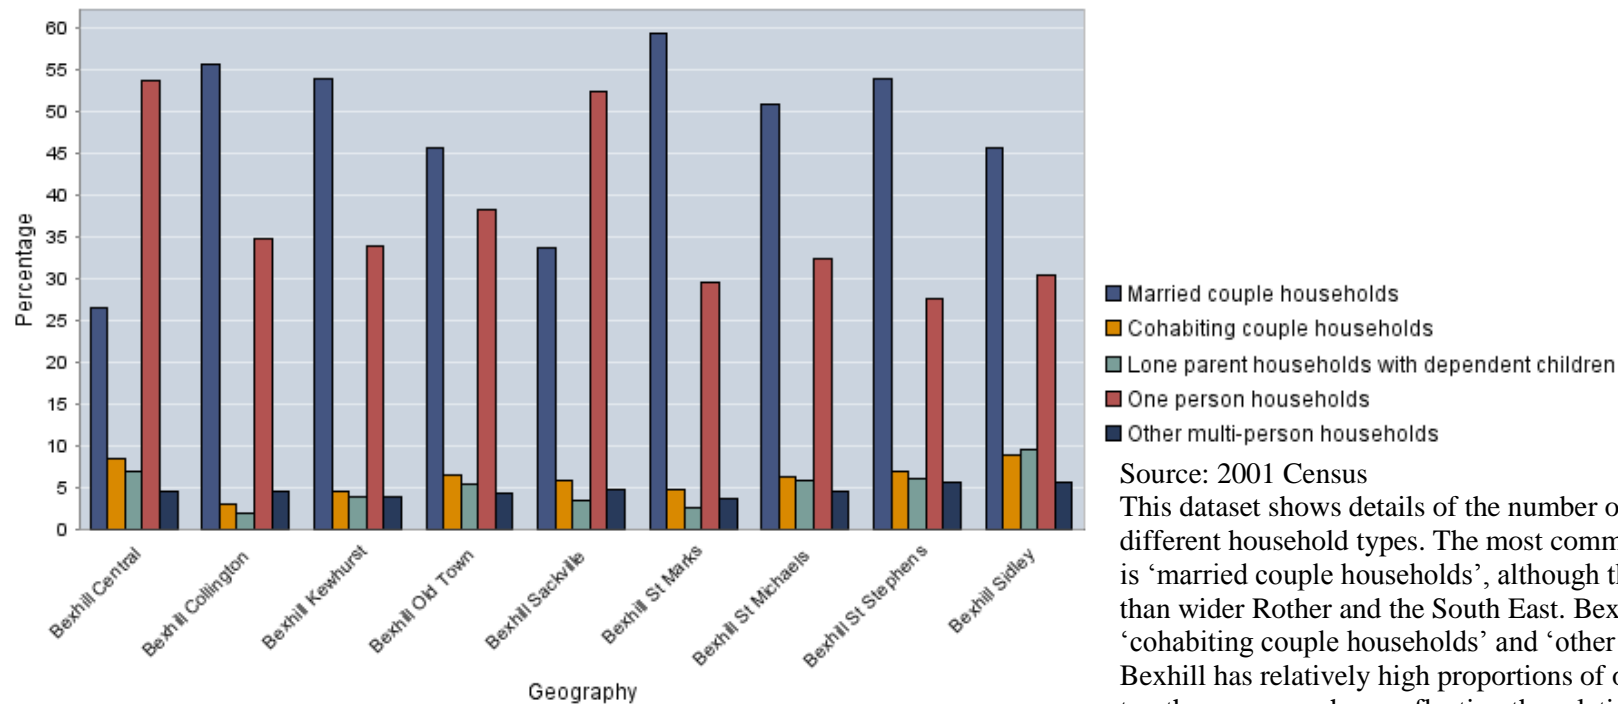

In addition, the total number of dwellings completed on exceptions sites are also shown.

These are sites where planning permission has been granted as an exception to planning policy for affordable housing to meet proven local needs, usually in rural areas.

Only net completions are shown. Net completions are the sum of new build completions, minus any demolitions, plus any gains/losses through change of use or conversions.

Source: 2001 Census

This dataset shows details of the number of households in 2001 by 5 different household types. The most common household type within Bexhill is 'married couple households', although the proportion of this type is lower than wider Rother and the South East. Bexhill exhibits low proportions of 'cohabiting couple households' and 'other multi person households'. Bexhill has relatively high proportions of one person households compared to other areas, perhaps reflecting the relatively elderly nature of the population.

Average Household Size

England and Wales	2.36
South East	2.38
East Sussex	2.23
Rother	2.17
Bexhill	2.0
Bexhill Central	1.76
Bexhill Collington	2.01

Source: 2001 Census

This dataset shows the number of households living in different types of housing tenure in 2001. Housing tenure refers to whether the house is owner occupied or rented from a private or social landlord, or the local authority.

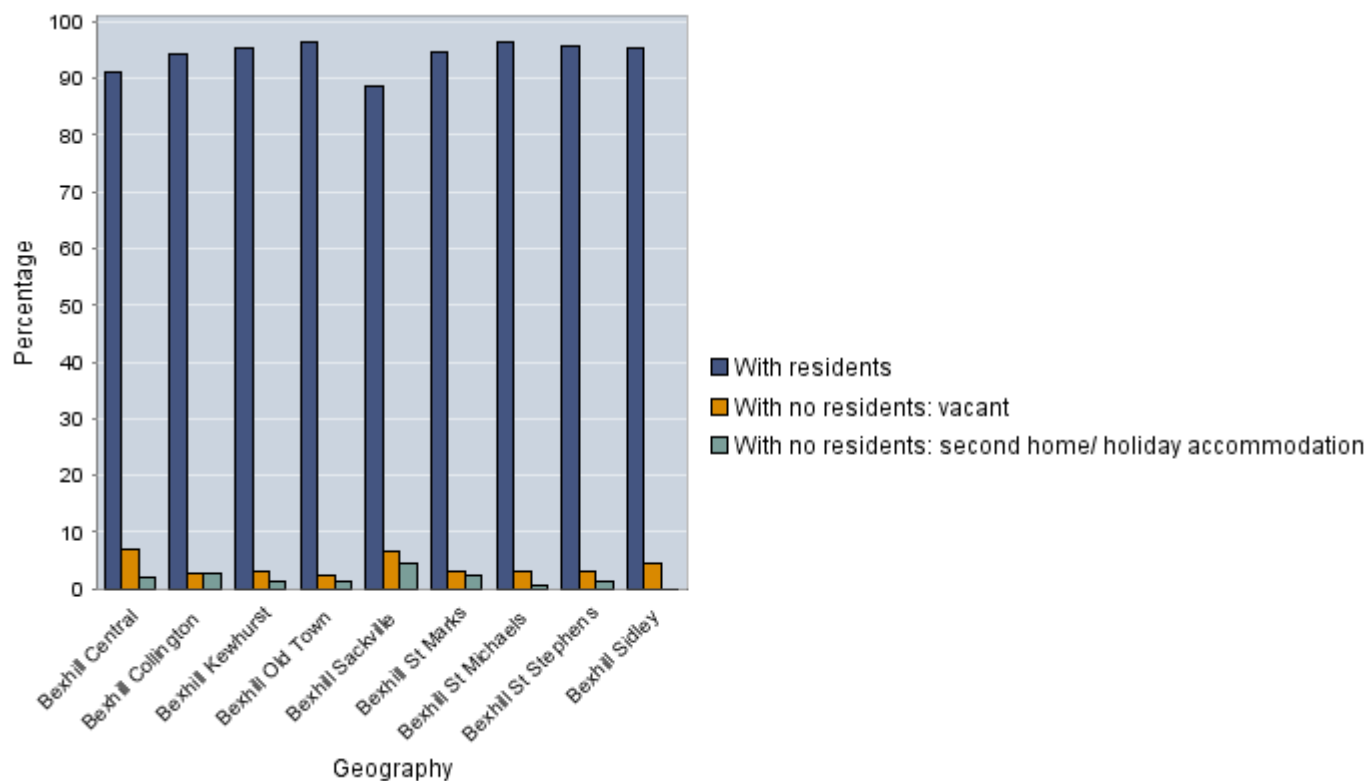

The majority of households within Bexhill are owner occupied (78.4 %) and of these 48.5 % are owned outright. These figures are slightly above that of Rother as a whole and well above national levels. Bexhill has comparatively low levels of rented accommodation and rented stock in Battle is typically rented from a Housing Association/RSL or rented privately. The social rented stock is concentrated geographically to the north east of the town, particularly Sidley Ward. There is hardly any social housing in St Marks Ward.

Vacant & Second Homes

Household spaces	All household spaces	With residents	With no residents: vacant	With no residents: second home/ holiday accommodation
Geography				
England & Wales	100	96.1	3.2	0.7

Source: 2001 Census

This dataset shows the number of occupied, partially occupied and unoccupied household spaces that were available in 2001. A household space is the accommodation occupied by an individual household or, if unoccupied, available for an individual household. Unoccupied household spaces are classified as either vacant, second residence or holiday accommodation. Bexhill has a lower level of vacant and second homes than the district as a whole however it does have a higher percentage than the regional and national levels.

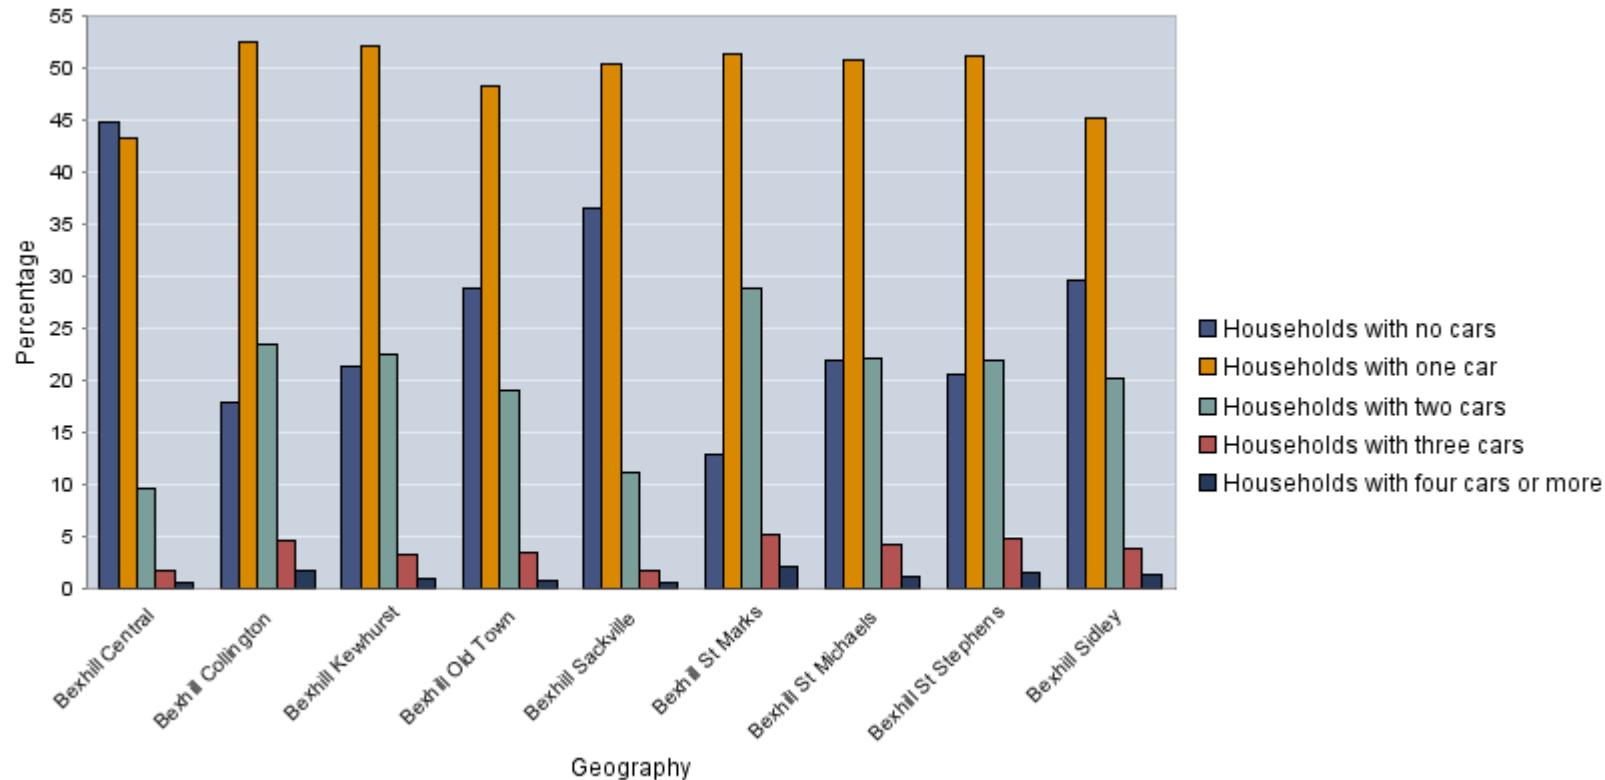

Car Ownership (Percentage)

Source: 2001 Census

This dataset shows which modes of transport are used by those who are in employment to get to their place of work. Persons are resident in the locations in the left hand column. Data is available for individual modes of transport and grouped into general transport types: public transport, private vehicles and walking and cycling. This table shows that the majority of people in Bexhill use a private vehicle to travel to work although a higher percentage do travel by foot or cycle compared to local and national averages.
