Life Expectancy

| Health expectancy | Life expectancy | Healthy life expectancy | Disability-free life expectancy |
|-------------------|-----------------|-------------------------|---------------------------------|
| England and Wales | 78.3 | 70.5 | 62.7 |
| South East | 79.4 | 73.2 | 65.8 |

| Eastern Rother | 78.5 | 71.8 | 63.2 |
| Rother Levels | 80.6 | 75.2 | 67.5 |
| Rye | 80.1 | 73.3 | 65 |

Source: Office for National Statistics, Life Expectancy at Birth 1999-2003 (experimental statistics)

This dataset gives 3 measures of health expectancy at birth:

- healthy life expectancy (HLE) at birth, defined as expected years of life in 'good' or 'fairly good' health;
- disability-free life expectancy (DFLE) at birth, defined as expected years of life free from limiting long-standing illness or disability.
- life expectancy at birth is also given for comparison and so the number of years of ill health can also be examined.

Data is presented as an average for the period 1999-2003. These are experimental statistics, meaning they are in the testing phase and not fully developed and so should be treated with a degree of caution.

This table shows that the life expectancy, healthy life expectancy and disability free life expectancy are all higher in Rye than the local and national averages.

This dataset shows the results from the Indices of Deprivation 2007 (ID 2007) for super output areas (SOAs) in East Sussex. Scores and rankings are given for the Index of Multiple Deprivation (IMD) and for each of the seven separate 'domains' of deprivation from which it is constructed.

The indices are used widely to analyse patterns of deprivation and to identify areas that would benefit from special initiatives or programmes. They are also an important tool in determining eligibility for specific funding streams

This dataset shows the number and percentage of children living in poverty. In this table, children in poverty are defined as those who are living in families who are in receipt of Child Tax Credit (CTC) whose reported income is less than 60% of the median income, or who are in receipt of Income Support (IS) or income-based Jobseekers Allowance (JSA).

This table shows that the percentage of children living in poverty within Rye is well above the national and regional levels and has increased between 2006 and 2008.

Other schemes were identified as part of the LATS process; these were assessed and prioritised against other transport schemes in the County for funding available through the LTP2 capital programme.

Therefore only those with the highest priority were able to be progressed. The LATS for Rye is a long term document and as a result other schemes may be considered in the future, if funding becomes available, such as contributions secured through new development.
