

Legend

-  SFRA Study
-  Romney Marshes IDB 8m buffer
-  Pevensey and Cuckmere WLMB 9m buffer
-  Main River 8m buffer
-  Ordinary Watercourses 8m buffer

Notes

This data has been generated by JBA using asset data provided by the Internal Drainage Boards. Only IDB adopted watercourses have been buffered. Byelaw 10 for the Romney Marshes Area IDB states that there are to be no obstructions within 8m of a watercourse. Byelaw 10 for the Pevensey and Cuckmere WLMB states that there are to be no works within 9m of a watercourse within consent from the Board.

EA main rivers have been buffered by 8m, this represents works covered under the Environmental Permitting Regulations (2016). A similar 8m buffer has been applied to ordinary watercourses outside of IDB areas.

Please note that this represents the best available data, and IDBs may adopt additional watercourses within their districts in the future.
