1. Introduction

- 1.1. This report provides information on the supply of employment land within Rother District as of 1 April 2024.
- 1.2. The report considers the contribution that sites under construction, sites with planning permission, sites allocated for employment use, and other identified employment sites are expected to make towards meeting the Rother Local Plan Core Strategy¹ targets related to the supply of employment floorspace.
- 1.3. For the purpose of this report, employment land (essentially land used for offices, industrial, and warehousing activities) falls within Use Classes E(g) and B of the Town and Country Planning (Use Classes Order) 1987 (as amended). The Use Classes Order was amended in September 2020, when a new Use Class E(g) replaced former Use Class B1. The uses considered to be employment land for the purposes of this report are set out in Figure 1 below, together with their current planning Use Class (and also the Use Class prior to September 2020).

Figure 1: Business Use Classes

Use	Use Classes: Current	Use Classes: Previous (up to 31/08/2020)
An office to carry out any operational or administrative functions	E(g)(i)	B1a
The research and development of products or processes	E(g)(ii)	B1b
Any industrial processes (which can be carried out in any residential area without causing detriment to the amenity of that area)	E(g)(iii)	B1c
General Industrial	B2 ²	B2
Storage or distribution	B8	B8

- 1.4. It should be noted that Use Class E also includes other commercial and service uses, including shops, cafes and restaurants, financial and professional services, and some community uses (former Use Classes A1, A2, A3, parts of D1 and D2). It is not possible to monitor changes of use within Use Class E, as changes of use within a single Use Class do not require planning permission, or notification to the local planning authority.

¹ [Core Strategy – Rother District Council](#)

² Unless the use falls within Schedule 2, Part A, Class E(g) – i.e. it is an industrial use that can be carried out in any residential area without detriment to the amenity of that area by reason of noise, vibration, smell, fumes, smoke, soot, ash, dust or grit. If this is the case, the use will fall within Class E.

2. Core Strategy Targets

- 2.1. The Rother Local Plan Core Strategy (adopted in 2014) identifies a need for at least 100,000 sqm of additional business floorspace across the district between 2011 and 2028.
- 2.2. The target is broken down by spatial policy area for Bexhill, Battle, Rye and Rye Harbour, the Rural Areas and the Hastings Fringes, as shown in Figure 2.

Figure 2: Core Strategy employment floorspace targets (sqm, 01/04/2011-31/03/2028)

Spatial Area	Approximate Development Levels 2011-2028
Bexhill	At least 60,000 sqm
Battle	At least 10,000 sqm (including sites on Marley Lane)
Rye & Rye Harbour	At least 10,000 sqm
Rural Areas	At least 10,000 sqm
Hastings Fringes	At least 3,000 sqm
Total	At least 100,000 sqm

- 2.3. Chapter 16 of the Core Strategy explains how the employment land need was derived, referring to the Employment Strategy and Land Review³, prepared jointly with Hastings Borough Council in 2008 and updated in 2011⁴ and 2013⁵. A further study, the Employment Sites Review background paper (Nov 2016)⁶, informed the Development and Site Allocations (DaSA) Local Plan (2019).
- 2.4. To inform its emerging Local Plan, which will cover the period 2020-2040, Rother District Council (RDC) have, jointly with Hastings Borough Council, commissioned a Housing and Economic Development Needs Assessment⁷ (HEDNA), which was completed in February 2024. The assessment identifies that Rother and Hastings form a single Functional Economic Market Area (FEMA). Taken by itself, it is projected that Rother will need an additional 74,189sqm of employment floorspace up to 2040, comprising of 22,776sqm of office space, 18,991sqm of industrial floorspace, and 32,422sqm of storage and distribution floorspace.

³ [Hastings and Rother Employment Strategy and Land Review \(2008\)](#)
⁴ [Hastings and Rother Employment Strategy and Land Review Update \(2011\)](#)
⁵ [Hastings and Rother Employment Strategy and Land Review Update \(2013\)](#)
⁶ [Employment Sites Review Background Paper \(rother.gov.uk\)](#)
⁷ [HEDNA \(rother.gov.uk\)](#)

- 2.5. The HEDNA found that the existing planned-for supply in Rother can meet and potentially exceed Rother's future needs for office and industrial development to 2040, although there is a supply shortfall for storage and distribution uses. Additionally, the HEDNA finds there is a shortfall of employment land in Hastings and therefore, when considered together, there remains an unmet need for employment land and premises across the FEMA as a whole to 2040.
- 2.6. It should be noted that since the publication of the HEDNA, it has been observed that three large employment sites in Rother with outline planning permission have dropped out of the supply pipeline:
- 7,000 sqm office floorspace supply (previously with outline planning permission ref. RR/2015/1760/P) at Worsham Farm, land north of Wrestwood Road, Bexhill, is no longer available due to the site's subsequent development as a mental health hospital as per planning permission RR/2022/1246/P.
 - 2,300 sqm of light industrial floorspace at Grove Farm, Robertsbridge (previously permitted through ref. RR/2017/1629/P) will not now come forward as the permission has been superseded through Reserved Matters permissions RR/2022/283/P and RR/2022/1850/P, which have removed the original employment provision at this site, replacing it with residential development.
 - 1,475 sqm of previously permitted employment floorspace has been lost from land north of Barnhorn Road, Bexhill, due to planning permission being granted for an alternative development comprising a medical centre and a smaller amount of employment floorspace (RR/2022/3018/P).
- 2.7. The reduced pipeline, as well as the shortfall across the FEMA, means that the Council must ultimately look for additional sites for employment development beyond the current pipeline. This search is taking place through the ongoing Housing and Economic Land Availability Assessment (HELAA), being developed to support the new Rother Local Plan and informed by a '[Call for Sites](#)', which remains open.
- 2.8. In terms of delivery, the HEDNA finds that, given viability issues in the private development market, the role of the public sector is essential in intervening in the property market to bring forward employment development, especially larger sites in north-east Bexhill which form a significant proportion of the currently supply pipeline. The HEDNA also notes that the delivery of new employment land and premises is a critical matter to support the local

economy and that the immediacy of forthcoming supply needs to be addressed, because very little is currently under construction in the principle urban areas.

- 2.9. This need for financial and strategic economic intervention in Hastings and Rother has long been recognised. This has led to a series of strategies and initiatives that support the Core Strategy’s assertion (paragraph 16.19) that “*because of the poor state of the economy and the pressing needs of businesses for more, and more modern, accommodation, this should be provided as soon as possible*”.
- 2.10. Relevant strategies and initiatives which look at current and future employment needs include:
- East Sussex County Council have worked with Team East Sussex (TES), the local federated board for the South East Local Enterprise Partnership (SELEP), to produce the joint *East Sussex 2050 Economic Prosperity Strategy*⁸, which was published in June 2024. The next steps involve the development of a high-level implementation plan, outlining the missions needed to deliver the vision of a more prosperous future for all.
 - The SELEP has itself published the *Economic Recovery and Renewal Strategy* in March 2021, which responds to the economic impacts of the pandemic on the South East Local Enterprise Partnership area, with ambitions for an increased support for digital infrastructure and sustainable growth.
 - Rother’s own *Economic Recovery Action Plan (ERAP)*⁹. To ensure consistency, the ERAP reflects the headline ambitions set out in the county plan, but with local targets and actions related to local needs and priorities. It sets out six broad ambitions, namely: thinking local, acting local; building skills, creating jobs; fast-forwarding business; better places, fuller lives; cleaner energy, greener transport; and the future is digital.
- 2.11. The marginal viability of new commercial developments in Rother means that existing employment sites make a particularly valuable contribution to the supply of business land and premises. Adopted Policy DEC3 of the DaSA Local Plan (which replaced Core Strategy Policy EC3) therefore requires the retention of existing employment sites, except where it is demonstrated that

⁸ <https://www.eastsussex.gov.uk/business/support/economic-development/economic-prosperity-strategy>

⁹ [Rother District Economic Recovery Action Plan \(moderngov.co.uk\)](https://www.moderngov.co.uk/rother-district-economic-recovery-action-plan)

retention is not a reasonable prospect or would cause serious harm to local amenities. Data on employment floorspace losses is included in this report.

- 2.12. Details of the economic health of the district can be found in quarterly 'Economic Updates' published on the East Sussex in Figures website¹⁰.

¹⁰ [See the Economic Updates section of ESiF \(eastsussexinfigures.org.uk\)](https://www.eastsussexinfigures.org.uk)

3. Employment Completions

Net change in employment floorspace

- 3.1. Figure 3 below shows that there was a net loss of 234 sqm employment floorspace overall for the monitoring year, which compares to the figure of 4,614 sqm of net gains for the previous year. While net completions vary considerably from year to year, indicating no particular trend, the loss of 234 sqm is the first overall annual floorspace completion loss since 2017/18.
- 3.2. In total, there has been a net gain of 33,973sqm of employment floorspace since the start of the Plan period (2011), equating to an average of some 2,613 sqm per year. Figure 3 illustrates net changes, by planning use class. As can be seen, changes vary considerably between years indicating no particular trends, although overall since the start of the Plan period, the largest gains have been in B8 uses (storage and distribution) and the largest losses have been in B2 uses (general industrial).

Figure 3: Net change in employment floorspace by use class (sqm, 01/04/2011-31/03/2024)

Year	E(g)(i) (B1a)	E(g)(ii) (B1b)	E(g)(iii) (B1c)	E(g) (B1)	B2	B8	Mixed E/B	Total
2011/12 - 2016/17	-1,285	0	1,559	6,080	2,623	3,170	-3,545	8,602
2017/18	-530	0	-297	0	421	87	0	-319
2018/19	-880	0	311	186	-6,801	19,366	214	12,396
2019/20	4,113	0	-99	264	206	3,053	0	7,537
2020/21	-301	0	-252	0	-455	1,166	0	158
2021/22	102	0	428	0	190	754	-255	1,219
2022/23	55	0	967	0	102	3,620	-130	4,614
2023/24	-218	0	-424	0	375	-234	267	-234
Total	1,274	0	2,617	6,530	-3,714	31,216	-3,716	33,973

- 3.3. Figure 4 shows the breakdown between development types and use classes for the monitoring year.

Figure 4: Net change in floorspace by development type (sqm, 01/04/2023-31/03/2024)

Type	E(g)(i) (B1a)	E(g)(ii) (B1b)	E(g)(iii) (B1c)	E(g) (B1)	B2	B8	Mixed E/B	Total
New Build	0	0	0	0	0	0	267	267
Change of Use	-278	0	-424	0	256	-234	0	-680
Redevelopment	60	0	0	0	119	0	0	179
Total	-218	0	-424	0	375	-234	267	-234

Gross employment use class gains

- 3.4. Figure 5 shows that there was 702 sqm of gross employment floorspace completed within the District in 2023/24. This is less than the previous year, and the lowest gross floorspace completion since 2012/13. The lower figure this year is not the consequence of greater floorspace losses, which are comparable to the previous two years, but instead reflect the overall lack of new employment development.

Figure 5: Gross employment floorspace gains by use class (sqm, 01/04/2011-31/03/2024)

Year	E(g)(i) (B1a)	E(g)(ii) (B1b)	E(g)(iii) (B1c)	E(g) (B1)	B2	B8	Mixed E/B	Total
2011/12 - 2016/17	2,518	0	2,565	6,080	4,126	3,747	3,163	22,199
2017/18	0	0	0	0	421	175	0	596
2018/19	357	0	512	186	1,245	19,475	214	21,989
2019/20	4,558	0	0	264	206	4,800	0	9,828
2020/21	319	0	0	0	198	1,206	0	1,723
2021/22	272	0	506	0	190	941	165	2,074
2022/23	99	0	2,246	0	237	3,620	0	6,202
2023/24	60	0	0	0	375	267	0	702
Total	8,183	0	5,829	6,530	6,998	34,231	3,542	65,313

- 3.5. It should be noted that Figure 5 shows all gross employment use class gains, including where floorspace has changed from one employment use class to another employment use class.

Gross employment use class losses

- 3.6. As shown in Figure 6, there was 936 sqm of employment floorspace lost over the monitoring year. Again, it includes use class losses where floorspace has changed from one employment use class to another employment use class.

Figure 6: Gross employment floorspace losses by use class (sqm, 01/04/2011-31/03/2024)

Year	E(g)(i) (B1a)	E(g)(ii) (B1b)	E(g)(iii) (B1c)	E(g) (B1)	B2	B8	Mixed E/B	Total
2011/12 - 2016/17	-3,803	0	-1,006	0	-1,503	-577	-6,708	-13,597
2017/18	-530	0	-297	0	0	-88	0	-915
2018/19	-1,237	0	-201	0	-8,046	-109	0	-9,593
2019/20	-445	0	-99	0	0	-1,747	0	-2,291
2020/21	-620	0	-252	0	-653	-40	0	-1,565
2021/22	-170	0	-78	0	0	-187	-420	-855
2022/23	-44	0	-1,279	0	-135	-130	0	-1,588
2023/24	-278	0	-424	0	0	-234	0	-936
Total	-7,127	0	-3,636	0	-10,337	-3,112	-7,128	-31,340

Actual employment floorspace losses

- 3.7. The data presented in Figure 7 below shows the actual amount of employment floorspace that has exited the market and excludes floorspace losses that are the result of an employment site changing between different employment use classes.

Figure 7: Actual employment floorspace losses (sqm, 01/04/2011-31/03/2024)

Year	Lost to Residential: Non-PD	Lost to Residential: Via-PD	Other Losses	Total
2011/12 - 2016/17	-1,697	-2,763	-2,020	-6,480
2017/18	-277	-450	-30	-757
2018/19	-1,888	0	-30	-1,918
2019/20	-2,120	0	-171	-2,291
2020/21	-372	-540	-653	-1,565
2021/22	-187	-248	-420	-855
2022/23	-503	0	-926	-1,429
2023/24	0	-414	-266	-680
Total	-7,044	-4,415	-4,516	-15,975

- 3.8. It can be seen that, over the monitoring year, 680 sqm of employment floorspace exited the market. Of this, 414 sqm of office floorspace was lost through permitted development to four one-bedroom flats, and 168 sqm of light industrial floorspace was also lost to residential use. Other notable losses include the loss of 234 sqm of B8 floorspace to use as a health centre.
- 3.9. Since the start of the Plan period, a total of 15,975 sqm of employment floorspace has exited the market. Some 72% of this (11,459 sqm) was through “permitted development” (development not requiring express planning permission).
- 3.10. When comparing the actual employment floorspace losses (Figure 7) to the gross employment floorspace losses by use class (Figure 6), it can be seen that a total of 15,365 sqm of employment floorspace has changed from one employment use class to another employment use class, since the start of the Plan period.
- 3.11. Furthermore, by subtracting the 15,365 sqm of employment floorspace that has changed use class, from the gross employment floorspace gains (65,313 sqm, Figure 5), it can be seen that a total of 49,948 sqm of new employment floorspace has entered the market since the start of the Plan period.

3.12. Therefore, when subtracting the sqm of actual employment floorspace losses (15,975 sqm, Figure 7), from the sqm of new employment floorspace (49,948 sqm, paragraph 3.11), it can be seen that there has been a net gain of 33,973 sqm of employment floorspace since the start of the Plan period, as shown in Figure 3.

Gross employment floorspace completed on brownfield land

3.13. Figure 8 shows the proportion of gross employment floorspace completions, by use class, which were on ‘brownfield’ or previously developed land¹¹. It demonstrates the contribution that existing sites and premises make to additional supply. Over the year, 67% of gross employment floorspace completions were on brownfield land. The proportion fluctuates year on year, indicating no particular trend.

Figure 8: Gross floorspace completions on brownfield land (sqm, 01/04/2011-31/03/2024)

Year	E(g)(i) (B1a)	E(g)(ii) (B1b)	E(g)(iii) (B1c)	E(g) (B1)	B2	B8	Mixed E/B	Total
2011/12 - 2016/17	82%	NGC	50%	24%	94%	57%	100%	62%
2017/18	NGC	NGC	NGC	NGC	100%	100%	NGC	100%
2018/19	0%	NGC	20%	0%	84%	100%	100%	95%
2019/20	29%	NGC	NGC	100%	100%	0%	NGC	18%
2020/21	64%	NGC	NGC	NGC	100%	20%	NGC	38%
2021/22	9%	NGC	100%	NGC	100%	100%	100%	87%
2022/23	100%	NGC	32%	NGC	100%	30%	NGC	32%
2023/24	46%	NGC	61%	26%	93%	73%	100%	67%
Total	82%	NGC	50%	24%	94%	57%	100%	62%

NGC = No gross completions

¹¹ Previously developed land is defined in the National Planning Policy Framework (2024) as ‘: Land which has been lawfully developed and is or was occupied by a permanent structure and any fixed surface infrastructure associated with it, including the curtilage of the developed land (although it should not be assumed that the whole of the curtilage should be developed). It also includes land comprising large areas of fixed surface infrastructure such as large areas of hardstanding which have been lawfully developed. Previously developed land excludes: land that is or was last occupied by agricultural or forestry buildings; land that has been developed for minerals extraction or waste disposal by landfill, where provision for restoration has been made through development management procedures; land in built-up areas such as residential gardens, parks, recreation grounds and allotments; and land that was previously developed but where the remains of the permanent structure or fixed surface structure have blended into the landscape.

4. Employment Land Supply

4.1. As Figure 9 shows, there is an overall current supply of employment sites where some 76,905 sqm of new employment floorspace can be constructed, of which some 44.4% has planning permission.

Figure 9: Supply of employment sites (sqm, 01/04/2024)

Year	Details	Total
Permitted	Under construction	23,018
Permitted	Detailed Permission (full or reserved matters)	13,002
Permitted	Outline Permission	0
Permitted	Permitted Development ¹²	-1,857
Permitted	Total	34,163
Identified ¹³	Total	16,442
Allocated ¹⁴	Total	26,300
Permitted, Identified and Allocated	Total	76,905

4.2. 76,905 sqm is a significant reduction from last year’s supply figure of 95,988 sqm. This is due to several factors. As noted above in paragraph 2.7, several sites which previously had outline permission for employment floorspace are no longer available due to subsequent planning permissions being granted for alternative uses. Additionally, some “supply” has now been built out (delivered), including 3,225 sqm of floorspace at Bexhill Enterprise Park (RR/2017/963/P) (this was actually completed in 2019/20 and so has been retrospectively recorded under that year’s completions, rather than under the completions for 2023/2024).

4.3. Other key supply changes reflected in Figure 9 above (compared to last year’s figures) include the re-categorisation of some 11,742 sqm of employment floorspace from “under construction” to “identified” (as of expired permission RR/2013/2166/P); and the re-categorisation of 25,500 sqm of employment floorspace from “identified” to “allocated” (RR/2017/2181/P, Land at Buckholt Lane, Bexhill).

¹² This relates to sites where planning permission is not needed, usually because “prior approval” has been granted or confirmed not to be required. The minus figure illustrates more losses of employment floorspace through permitted development than gains.

¹³ ‘Identified’ status indicates sites that previously had planning permission (but the permission has expired) but where it is still expected that the site will come forward given landowner intentions to develop the site.

¹⁴ Allocations that have not yet received planning permission. Note that in addition to new employment sites, this includes some losses of employment floorspace where employment sites are allocated for an alternative use.

- 4.4. As shown in Figure 9, overall, 23,018 sqm of employment floorspace is currently under construction, while there is a further 13,002 sqm of employment floorspace on sites with detailed planning permission. A further 16,442 sqm of floorspace is 'identified' (not currently allocated or with permission, but still considered suitable and available for employment development), and 26,300sqm of employment floorspace is allocated through the Development Plan but is not yet permissioned.
- 4.5. A full breakdown of the current employment land supply is shown in Appendix 2.

5. Performance

- 5.1. The Core Strategy targets relating to the scale of additional business land and floorspace required between 2011 and 2028 are detailed in section 2 of this report.
- 5.2. In terms of performance against the identified Core Strategy target, net additional employment floorspace completed since 2011 has been modest, with some 33,973 sqm completed against the 'at least' target of 100,000 sqm.
- 5.3. This leaves a further 66,027 sqm to be completed up to 2028, equating to an average of some 13,205 sqm per year, far higher than the current annual average of 2,613 sqm.
- 5.4. Figure 10 shows employment floorspace completions year-on-year within the main spatial areas of the district, and Figure 11 shows the cumulative employment floorspace completions since 2017 against the Core Strategy target.

Figure 10: Area cumulative floorspace completed (sqm, 01/04/2011-31/03/2024)

Year	Bexhill	Battle	Rye & Rye Harbour	Rural Areas	Hastings Fringes	Total
Target	60,000	10,000	10,000	10,000	3,000	100,000

2018/19	91,717	12,396	20,679	79,321
2019/20	79,321	7,537	28,216	71,784
2020/21	71,784	158	28,374	71,626
2021/22	71,626	1,219	29,593	70,407
2022/23	70,407	4,614	34,207	65,793
2023/24	65,793	-234	33,973	66,027

- 5.5. As illustrated in Figure 9 above, some 36,020 sqm of employment floorspace is currently under construction or has detailed planning permission. This represents just over half of the remaining floorspace requirement from the Core Strategy (66,027 sqm) and can be considered “deliverable” and expected to be built out in the coming years. This includes several of the larger employment sites at Rye Harbour and Hastings Fringes.
- 5.6. If the floorspace to be provided by the other allocated sites and identified sites is added to this, then overall, the District can in theory meet the Core Strategy target of at least 100,000 sqm of additional employment floorspace, if current permissions, identified sites and allocations are built out, as shown in Figure 12. However, given the average build-out rate, this is perhaps unlikely to be achieved before the end of the Plan period (2028).
- 5.7. Furthermore, delivery and the performance against the Core Strategy targets differs between the spatial areas of the district, as shown in Figure 12 below.

Figure 12: Performance against Core Strategy employment targets (sqm, 01/04/2024)

Year	Bexhill	Battle	Rye & Rye Harbour	Rural Areas	Hastings Fringes	Total
Target	60,000	10,000	10,000	10,000	3,000	100,000
Completed	2,411	1,073	19,229	11,316	-56	33,973
In progress	10,980	195	5,331	1,911	4,601	23,018
Permitted	557	555	2,954	6,847	232	11,145
Identified	13,742	2,700	0	0	0	16,442
Allocated	25,500	0	0	3,000	-2,200	26,300
Total	53,190	4,523	27,514	20,667	2,577	110,878

- 5.8. As shown, Bexhill, Battle and Hastings Fringes are currently falling short against their outstanding need as per the Core Strategy targets. There is a deficit of 6,810 sqm in Bexhill, 5,477 sqm in Battle, and a smaller deficit of some 423 sqm in the Hastings Fringes.
- 5.9. Rye and Rye Harbour and the Rural Areas are currently projected to provide 17,514 sqm and 13,074 sqm, respectively, above target. While this suggests that there is no quantitative requirement for additional employment floorspace in Rye & Rye Harbour or the Rural Parishes, it should be appreciated that the Core Strategy targets are “minimum”; that there is a shortfall of supply in the neighbouring borough of Hastings, which together with Rother forms a single Functional Economic Market Area; and that there are needs and opportunities for additional business space in particular localities. This will be considered further through the emerging Local Plan to 2040.

6. Appendices

Appendix 1: Employment floorspace completions (01/04/2023 - 31/03/2024)
